Carter Two-engine Automobile conceived May 19,

Exceedingly broad patents granted Carter Two-engine Automobile.

Rather than sell these patents, an independent company, known as the Carter Motor Car Corporation, was organized and subsequently incorporated under the laws of South Dakota. Par value of stock \$1.00.

On September 1, 1906, offices were opened in the Munsey Building, Washington, D. C., and an assembling plant secured in Detroit, Mich. The inventor, Howard O. Carter, taking charge in Detroit.

A number of Carter Two-engine cars were immediately constructed-two of them shipped to Washington for demonstration purposes.

For the purpose of erecting a factory in the vicinity of Washington, the selling of stock was inaugurated by many purchases of from 50 to 5,000 shares. The campaign of personal solicitation developed so satisfactorily that a broader plan of publicity was decided upon, and the first advertisement offering stock to the public appeared in the Washington press of January 13, 1907. That the first building of our plant is now completed and foundations finished for two adjoining buildings is evidence of the result of this public offering of stock.

# A Proposition

Mr. Howard O. Carter, patentee of the Carter Twinengine Car, and owner of one-eighth interest in the Carter Motor Car Corporation, donated sixty thousand shares of his personal holdings for the purpose of hurrying the completion of the plant at Hyattsville, Md., and thereby have a dividend-paying business at the earliest possible time.

Donations will be distributed as follows: To each and every purchaser of Carter Motor Corporation stock, at \$2.00 per share, either cash or installment, Mr. Carter will give three shares of his stock with each share purchased.

## Stocks Will Be Withdrawn from Market Upon Completion of Factory.
